The Drum Lid Vac is an air powered industrial vacuum system that turns your old steel drum into a powerful wet and dry with reverse pump out vacuum.

Ideal for all spills of water, oils, hydraulic fluid, flammable fuels, diesel, slurry, mud, chemicals, pesticides, coolant and any fluid with solids suspended in it.

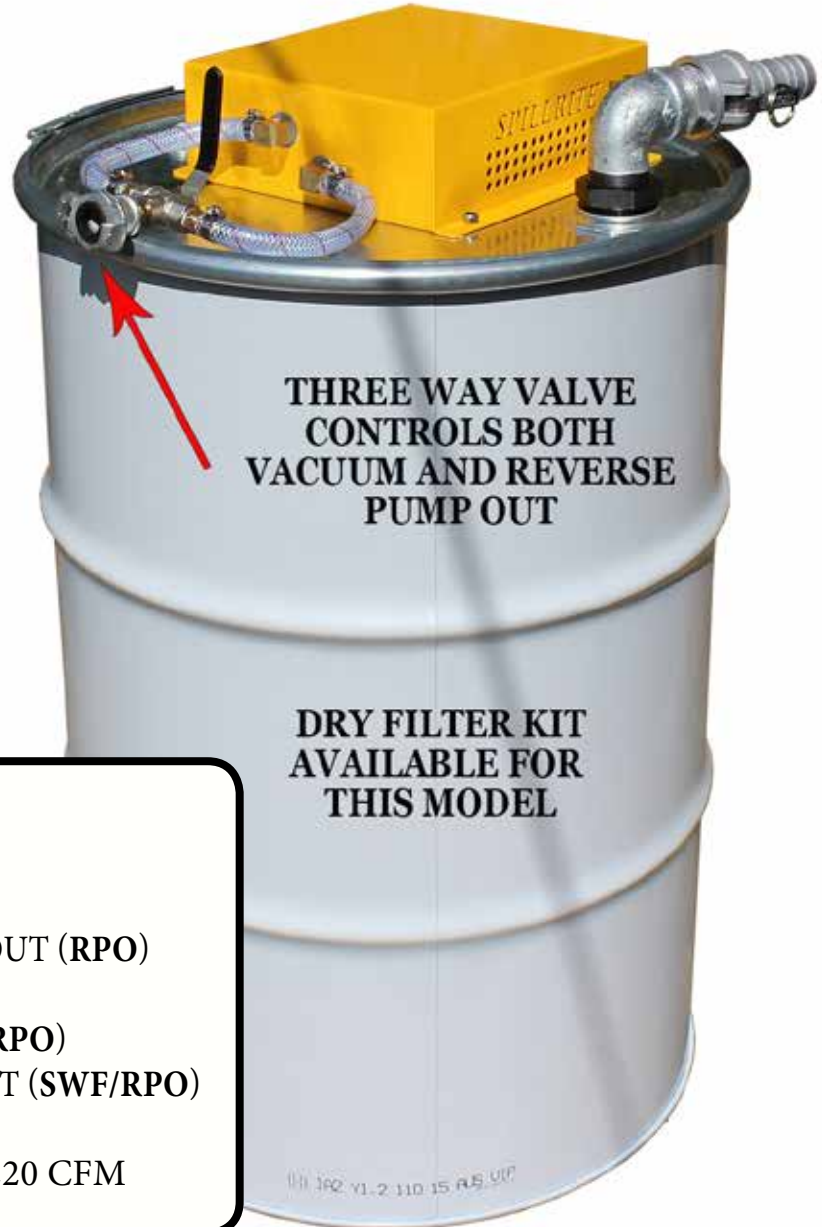

With twin venturi's, the DLV has massive pick up providing a fast and efficient solution to factory and warehouse spill control.

- Reuse your expensive fluids
- Have a fast spill control vac
- Huge power, low noise

MODELS AND TYPES

STANDARD VACUUM ONLY (SVO)
STANDARD VACUUM & REVERSE PUMP OUT (RPO)
EXPLOSION PROOF VAC ONLY (EX/VO)
EXPLOSION PROOF VAC & REVERSE (EX/RPO)
SWARF & CHIP VAC & REVERSE PUMP OUT (SWF/RPO)

- 48 CFM • 100 CFM • 180 CFM • 220 CFM

ALL HEAVY THICK AND NASTY FLUID AND SOLIDS SUSPENDED IN FLUIDS

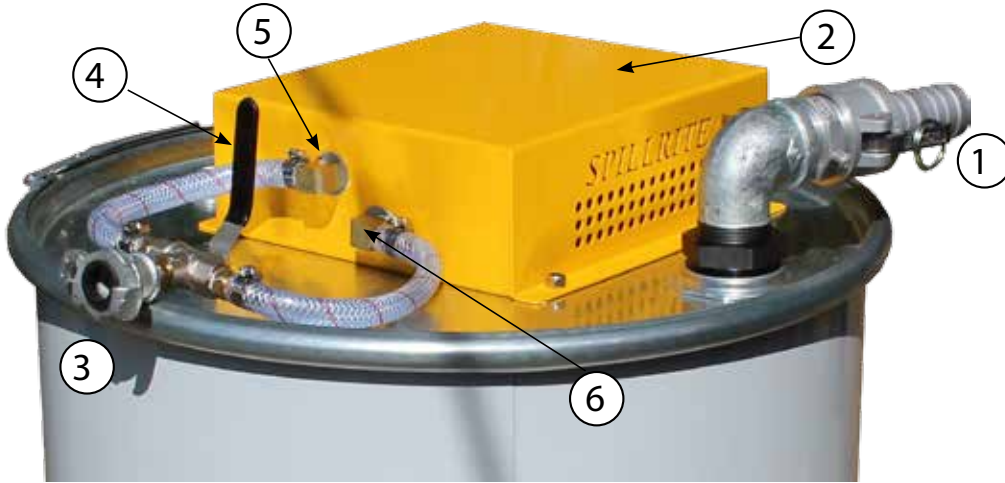

“When serious power is required....”

1 300 258 407

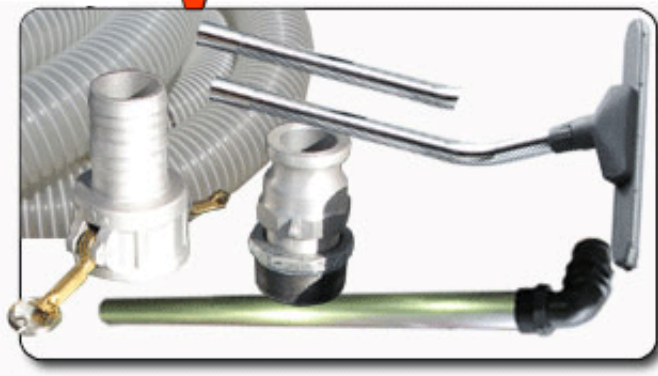

Eye Protection

- 1. Suction intake
- 2. Silencer shield
- 3. Air connection
- 4. Vacuum and reverse pump control valve
- 5. Vacuum air connection
- 6. Reverse pump out air connection

EACH UNIT COMES WITH 3 METRES OF HOSE, TOOLS, CAMLOCKS

FLAMMABLE FUELS, DIESEL, OILS, BENZENE, JET FUEL

Chip Vacuum Swarf Coolant Drum Lid Vac Wet RPO Drum lid vacuum for spill control, sump recovery, coolant recovery, oils, sludge, tramp oil and allengine case fluids.

This drum lid vacuum comes with a Spillrite venturi pneumatic power head fitted to standard galanised 205 drum lid. It has an additional 3 way marine valve fitted with 38mm transfer hoses to the two 50mm bung holes. The bung on the left is fitted with a poly tank fitting and an attachable swarf collection bag that allows fluid to penetrate the bag and leave the collected swarf trapped. The bung on the right is fitted with an internal drop pipe that facilitates

All Swarf drum lid vac units come with the following standard inclusions;

- High quality powder coated 2mm steel shroud
- Automatic shut off float valves
- 3 metres of hose
- Three way valve kit
- Swarf and chip bag assembly
- 38mm crevice tool
- Internal drop pipe for pump out models
- Wand and squeegee
- All fittings for drum lid
- Ball valve
- Reverse ball valve (RPO models only)
- Anti static earth strap (EX models only)
- Lid (205) and lock ring
- Instruction sheet

MAIN FEATURES OF THIS MODEL

The Drum Lid Vacuums come in 4 different power levels.

The more power you consume the more power is created and this enables longer hose lengths, greater vertical lift and larger hose diameters.

YOU NEED AIR COMPRESSOR

45-50 CFM

VAC & HOSE

- 100 psi/7 bar
- 45-50 cfm
- 15" Hg
- 445 Millibars
- 38/50mm hose
- 10m max hose wet
- 5m max hose dry

MAIN APPLICATIONS

SPILLS, OILS, DRY WASTE

HOW TO USE

CONNECT AIR START VAC

MAIN FEATURES

REVERSE PUMP OUT
fills 200 litres in under 90 seconds

TANK SIZE

200 LITRES

FILTRATION

CARTRIDGE

MAIN FEATURES OF THIS MODEL

YOU NEED AIR COMPRESSOR

100 CFM

VAC & HOSE

- 100 psi/7 bar
- 100 cfm
- 16" Hg
- 541 Millibars
- 38/50mm hose
- 15m max hose wet

MAIN APPLICATIONS

FLAMMABLE FLUIDS

HOW TO USE

CONNECT AIR START VAC

MAIN FEATURES

REVERSE PUMP OUT
fills 200 litres in under 90 seconds

TANK SIZE

200 LITRES

WET ONLY

DRUM LID VAC RAPID SPILL VACUUM

ALL SPILLS AND WET RECOVERY
