Stair Climbing Trolleys

CargoMaster Electric Stair Climbing Trolley

The manual handling of heavy goods on stairways can easily lead to accidents.

CargoMaster Electric Stair Climber not only safely moves heavy loads, it often dispenses with the second person often required for this process & pays for itself in a very short time.

It is invaluable where safe transportation of goods, together with climbing speed and versatility is called for. With little effort the CargoMaster is capable of easily moving drink cartons; paper, drums, water bottles, office equipment etc up to 170 kg @ 25 steps per minute. Narrow stairs are no problem as its safe climbing mechanism manages even winding stairs ensuring that step edges are not damaged.

CargoMaster features a continuously adjustable speed control is located on the device's grip and safety brakes make sure that the device stops automatically at each edge of a step. For difficult climbing situations the standard single step function is an absolute boon.

It is also an indispensable transportation aid on level ground. Its strong electric motor is powered by sealed vapour proof batteries that can be charged by any 240v supply circuit. With an additional battery pack & a car charger the CargoMaster can be used continuously. The solid rubber tyres are comparable to devices featuring pneumatic tyres & it never has a flat.

The handle can be adjusted to the user's height and centre of gravity depending on the device's load. It weighs only 27kg; measures 1060x450x300mm with the toe plate folded and fits into any car without a problem. Intelligent accessories make the CargoMaster perfect for all kinds of different handling problems. The standard unit includes a battery pack and 240v charger. Reduce health risks and costs by letting CargoMaster Electric Stair Climber do the heavy work for you.

CargoMaster BC400 Stair Climbing Trolley – YOUR STRONG PARTNER

Most often several persons are needed for the transportation of extremely heavy loads. This type of work particularly strains a person's back and joints. Therefore, rather often, there is a shortage of personnel due to back problems and joint injuries.

The **CargoMaster BC400** renders it possible for one person alone to effortlessly & safely transport loads up to 400 kg, which makes the device your ideal partner. Whether the loads have to be transported up and down stairs or on level ground does not make any difference. Even the loading and unloading of vehicles or shelves is easily possible with the **CargoMaster BC400**, thanks to its integrated lift.

- Continuously adjustable climbing speed
- No damage of goods or stairs
- Electrical adjustment of the toe plate to adjust to the centre of gravity
- Integrated lift to facilitate loading and unloading
- Puncture-proof tyres
- Considerable relief for the personnel
