BATTERY ELECTRIC VEHICLE

DDM is a 3 wheels stand on electric scooter that is ideal for personnel displacement, for transportation of small bulky goods, for maintenance and inspection activities inside hospitals, warehouses, airports, markets or shopping centers. With a loading capacity 50 kg / 110 lbs, this electric scooter can tow up to 500 kg / 1102 lbs on flat grounds and can therefore be useful to tow a train of trolleys.

It is equipped with 80A lead acid batteries that guarantee a 8 hours running time. Low maintenance, silent running, easy to use it comes with standard display showing battery level , an acoustic signal indicating when batteries need to be recharged, on/off key and a forward/reverse button.
