POWER DRIVE WHEELCHAIR

STURDY, SAFE AND RELIABLE

Our Carer Controlled Bariatric Wheelchair **ROLLEE** makes patient transport safer and easier than ever before and is ideal for hospital emergency departments.

Its Australian design, engineering, construction and refinement in large hospitals over the last eight years, ensures this wheelchair is a worthy addition to your workplace.

It has been manufactured with precision and a wealth of experience, from leaders who have decades of knowledge in servicing electrical mobility **SECTOR**.

There's no doubt patient transport is one of the most physically demanding tasks. Internal studies conducted by hospitals have concluded that patient transport is a high risk activity. Not only due to common injuries such as back strain, but also through the cumulative result of minor strains and overexertion over the course of numerous years.

Today's healthcare environment is a challenging one with bigger, heavier and more patients frequenting hospitals than ever before. As a result, staff are forced to bear the brunt of an increased dependence for patient mobility.

KEY FEATURES

- ⌚ Precise joystick control with variable speed button
- ⌚ Automatic security brake ensuring patient transport is smooth and easy
- ⌚ Available with 26 inch wide seat

KEY BENEFITS

- ⌚ Lessens the risk involved with patient transport for patients.
