

# BALL TRANSFER TABLES SPECIFICATIONS

Our Ball Transfer Tables assist in the movement of products over a horizontal plane in either direction. They're best for moving steel plates around guillotines and presses, multi-directional product transfers between conveyors, and tote box component handling around machines.

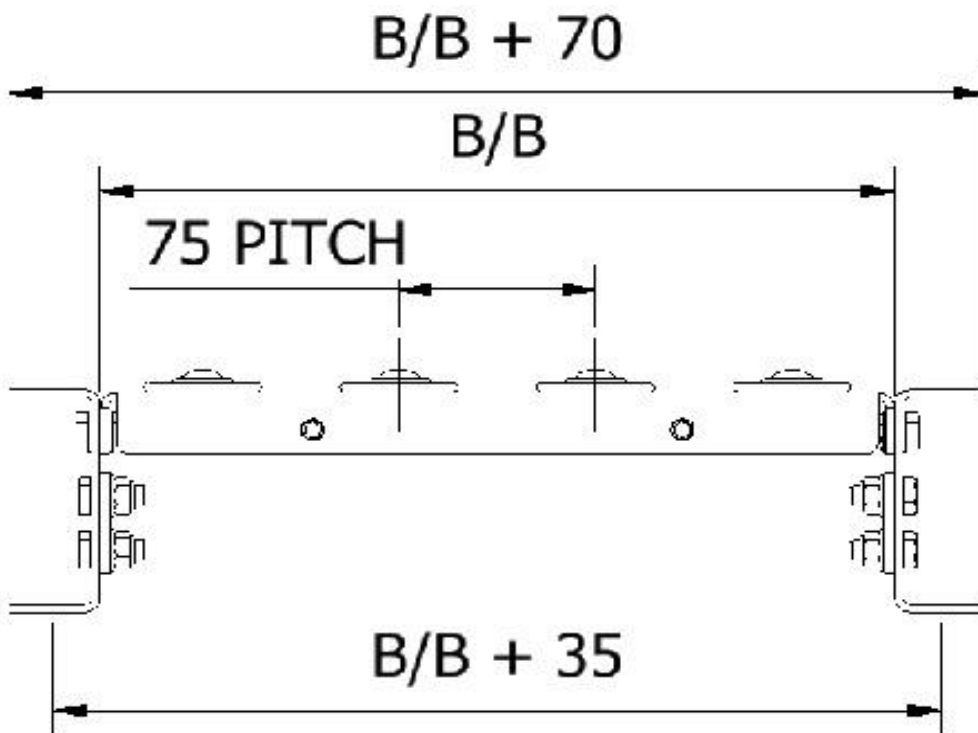

## Standard Ball Transfer Conveyor Decks:

- Mild steel modular construction powder-coated
- 750, 1500 or 3000 mm lengths with 35 x 90 x 3 mm side channels
- B/B widths 317, 417, 517, 617 or 817 mm
- CWC02 push in ball transfer with 75 mm pitch centre to centre

Note: These products are custom made to order. Please ask our facilitators for a proposal or more information.

## Specifications:

CWC02 Ball Transfer

Ball transfer table 750 mm
