

BULK BAG FILLING FRAME MBFU250 SPECIFICATIONS

(Bulk Bag & Chains are not shown)

The MBFU250 Bulk Bag Filling Frame is designed to hook a 4-point Standard Bulk Bag and fill free flowing bulk products such as sand and gravel, etc. The Bulk Bag is hooked onto 4 Safety Swivel Hooks (supplied) and the Filling Frame is held over a four corner Support Frame.

The adjustable bag restraining chains position the Bulk Bag at the correct height to the loader to discharge the bulk material through the hopper.

The frame has 3 adjustable height settings allowing for optimum removal of filling bags to suit your operational requirements.

Upper Hopper Assembly is finished in enamel paint and the Support Frame is zinc plated.

Technical Information:

- Pocket Size 140 x 65mm
- Pocket Centres 850mm
- Working Load Limit (WLL) 1000kg
- Unit Weight 270kg
- Load Centre 900mm
